Animate in one click with Morph

Creating stunningly animated objects, shapes, and text used to involve complicated steps and pre-defined animation paths to get the desired effect. Lots of tedious work, just for a single item.

But now, Morph in PowerPoint takes the pain out of creating amazing effects and creates cinematic motion by seamlessly animating between your slides. Text, images, 3-D shapes… you name it. Simply duplicate a slide you want to animate with Morph, move the objects, resize, or spin, and click the Morph button under Transitions. Stunningly-simple animations with just one click. It’s just that easy with Morph!

Real-world scenarios:
- Build more compelling presentations
- Improve storytelling with smooth transitions
- Build presentations that stand out amongst peers
- Create professional content without a designer

Office 365
A step-by-step guide to demo Morph

Step 1
Right-click the slide you want to animate and choose **Duplicate Slide**.

Step 2
In the new slide, move or resize objects and change the size or color of text.

Step 3
Click **Transitions**, and then click **Morph**.

Step 4
Click **Preview** to see the animated slide transition.
